

### Natural Gas Cooling Solutions

Torrent Energy Services has developed a new product line of Natural Gas Cooling Solutions to meet pipeline transmission or wellhead processing requirements. This skid mounted, portable and expandable Gas Cooler is designed for low cost, quick and easy installation and start up.

The TGC-108EH Natural Gas Cooler has a nominal capacity of 25 MMSCFD designed to cool to a 15° to 20° approach to ambient temperatures. The EH style cooler features vertical exhaust which provides optimal performance in any wind direction. This Gas Cooler comes complete with a natural gas engine, fuel gas scrubber, control panel and hydraulic jack, which eliminates the need for a crane to swing the engine between operating and transporting configurations, included.
