

TORRENT ENERGY SERVICES

Torrent enables its completion, production and midstream customers to achieve their ESG goals while increasing productivity, maximizing profitability, and reducing flaring and VOC emissions. We are the premier, full-service, turnkey solutions provider for fuel gas conditioning, flare gas mitigation, power generation, NGL recovery, and VOC emission reduction.

Torrent's leadership team has more than 100 years of experience in the processing, treating and compression industry and the company is currently active throughout the United States, serving multiple basins including Bakken, Appalachian, DJ, Anadarko, Barnett, Permian, Haynesville, and Eagle Ford.

EQUIPMENT

- Mechanical Refrigeration Units
- NGL Storage Tanks
- Natural Gas Coolers
- Pressure Reduction Units
- Natural Gas-Powered Generators
- Engineered Solutions
- Field Support Services

SERVICES

- Gas Processing
- Natural Gas Cooling
- Fuel Gas Conditioning
- Gas Lift Operations
- Gas Capture
